

# Lutecium Psychoanalytic Group

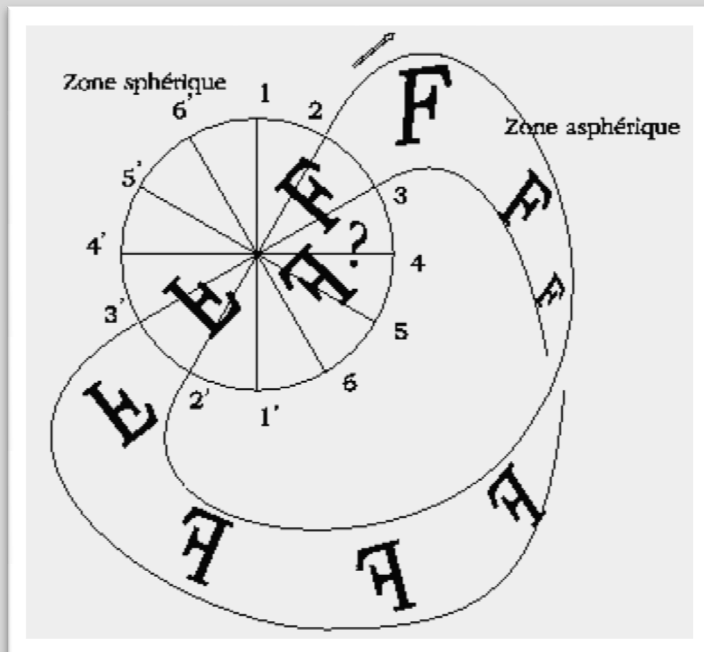

Presents

March 19 – 22, 2009 Immersion Course

with Jacques Siboni, M.D. & guest Robert Groome

*“Transformation of an Object of Reality into an Object of Desire”*

Didactic seminar by Jacques Siboni, M.D.

“I go back here to parts of my previous articles. The projective plane is an object which dates back to the discoveries of perspective by Leon B. Alberti and Filippo Brunelleschi in the Renaissance. It is the mathematical formulation of the vanishing points and parallels which join at infinity... The projective plane can thus be thought of as an assemblage of a spherical zone, the Euclidean plane, and of an aspherical, moebian zone, the projective straight line. You should be aware that, as indicated in the figure, a letter *F* which wanders on the plane to its projective confines comes back in reverse, like a right hand becoming a left hand, or comes back on the other side of the Euclidean disk if it is considered as an opaque disk.”

– Jacques Siboni, M.D.

*“Introduction to the Topology of Psychoanalysis”*

A talk by Robert Groome

Responding to the following questions: What is a psychoanalytic didactic? What is a psychoanalytic experience? Who analyses and what is analysed? What is a psychoanalytic school and clinic?

## The Lutecium Immersion Itinerary:

March 19, 6pm – 8pm: Case Conference (Flood Building, 870 Market St, SF)

March 20, 7pm – 8pm: Writing Group “Letters” Reception Night (Flood Building)

March 21, 12pm – 5pm: Film Event (Hobart Building, 582 Market St, SF)

March 22, 12pm – 4pm: Didactic Seminar with Jacques Siboni, M.D. (Flood Building)

4pm – 5pm: Talk by Robert Groome (Flood Building)

5:30pm: Immersion Reception (Flood Building)
